A bot wrote this obituary and I'm losing my mind

Brenda Tent retired from living at the age of old, surrounded by family and natural causes. A librarian from birth, Brenda was an avid collector of dust. She had a sweet heart and married her high school. She loved having hobbies and helping her sons to be disadvantaged youths. She had no horses but thought she did. The church gave her a choir because she sang like hind and looked like bird and Brenda was a bird. She owed us so many poems.

The funeral will be held in 1977 at heaven. In lieu of flowers, send Brenda more life.

See you in 1977

It is literally impossible to pick a favorite line from this because the entire thing is gold.

WHAT IS MACHINE LEARNING?

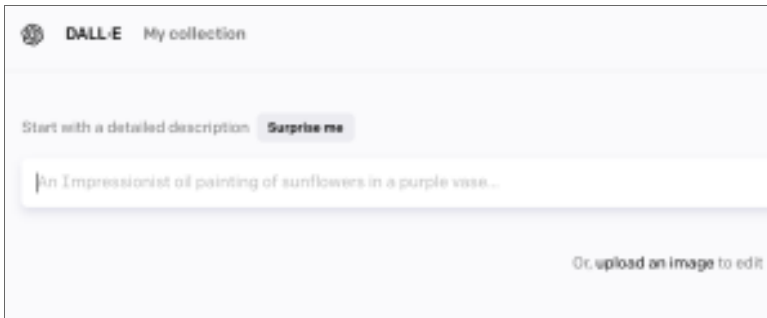

- Essentially, these are computer programs which improve from experience over time.
- It is a subfield of artificial intelligence.
- But, artificial intelligence involves learning. Yes, things are blurry.

In recent years, there has been a growing awareness of the importance of web accessibility – that is, making sure that websites can be used by everyone, regardless of their abilities or disabilities. There are a number of reasons why this is important. First, it's a matter of civil rights. People with disabilities have the same right to access information and services online as everyone else. Second, it's good for business. By making your website accessible, you can expand your potential customer base and tap into a growing market. And third, it's the right thing to do. The internet should be inclusive for everyone. So what does it take to make a website accessible? In this article, we

0 minutes ago

In recent years, there has been an increased focus on making the internet accessible for everyone. This is especially important for people with disabilities, who often face barriers when trying to access online content. Web accessibility is the process of making websites and web applications accessible to people with disabilities. This includes ensuring that all website content is available to anyone at any time on any device, regardless of their physical or cognitive limitations. There are many different ways to make a website accessible, including using accessible images, adding keyboard input, and ensuring a good tab order. Making the internet accessible is an important step in making sure that everyone can participate in the digital world.

BLOG WRITER RESULTS

- Text file (can view in browser)
- MS-Word document (will be prompted to download)
- Adobe PDF document (should open in browser)

Keep in mind, only a few keywords were provided.
The rest was all generated by AI (and Machine Learning).

HOW DOES ALL THIS ACTUALLY WORK?

- Relatively simple example using JavaScript
- Keep in mind this example has over **141K** lines of JS code
- The ML code to make DALL-e and Simplified work has a much larger core library
- These are offered for free as they want more learning to happen (you are paying with your data)

TensorFlow.org – JavaScript library

- Include script tag (relying on CDN)
- `<script src="https://cdn.jsdelivr.net/npm/@tensorflow/tfjs@2.0.0/dist/tf.min.js">
</script>`
- I provide a slightly modified working example we will discuss.
- Alternate approach (npm with yarn)
- Built on ml5.js library

TENSOR FLOW EXAMPLE

- Review code and example
- References

PRACTICAL APPLICATION

Just one example – this uses “facial recognition” AI to identify individual whales. For example, the tail flukes are visible (and photographed) just before a humpback whale does a deep dive.

<https://happywhale.com/home>

<https://happywhale.com/individual>

[/77272;enc=335720](https://happywhale.com/individual/77272;enc=335720) (one I photographed may be new to science)

Uses of AI and machine learning – let's discuss

- AI art can not be copyrighted
- Dangers of AI
 - Recreating you
 - Gaming wrong answer clues
 - Your privacy
 - Startups are not all equal (some may try to game you)
- How AI is improving accessibility

ChatGPT after having to deal with humans every day
